

Ooni Volt 12

Electric Pizza Oven

Designed for indoor and outdoor use, the Ooni Volt 12 Electric Pizza Oven cooks epic 12" pizzas in just 90 seconds, all from the comfort of your own kitchen or garden.

Key Features

Ooni's first all-electric pizza oven, offering maximum versatility and performance with a beautiful, modern design.

Reaches 450 °C (850 °F) in just 20 minutes, for fresh stone-baked pizza in just 90 seconds.

Generous 13-inch cooking area and plenty of height in the oven for any pizza style.

Fine-tune the oven's settings for different pizza styles such as Detroit, Neapolitan-style and more with ease.

Conveniently fits on any standard kitchen counter.

Ready to cook straight out of the box: just switch on and go.

Innovative design for delicious pizza, whatever the weather.

Built-in temperature, time and balance controls offer a precise cooking experience for beginners and pizza-experts.

Innovative Boost feature to get baking stone back up to top temperatures in just 45 seconds, so you can cook multiple pizzas without compromising the bake.

Easily portable with built-in handles.

Fully insulated, powder-coated carbon oven provides advanced energy efficiency. Volt retains maximum heat and stays cool enough to touch.

Automatically turns off after 45 minutes of inactivity for safety and energy conservation.

No mess dual electric element fuel source. Simple and easy to clean.
