Care and Use for Grill Glove

Mode d'emploi et conseils d'entretien pour Gant pour barbecue

*Artikelnr. 18325, 25031, 25093*

## Dear RÖSLE customer,

Thank you for purchasing one of RÖSLE's high-quality products. You've made an excellent choice – an investment in quality and durability.

### 1. Description and use

5-finger grill glove made from split leather, lined inside, all seams are piped, size 24/XL. The grill glove is heat-resistant and suitable for use with grills, in agriculture, construction, metalworking and the automotive industry as well as for almost all deburring work. It is sturdy and resistant while the inner lining also makes it comfortable to wear.

**Warning:** These gloves do not provide protection against electric shocks caused by defective devices or through contact with live parts. Soiled, wet or sweat-soaked gloves have lower electrical resistance. This increases the risk of electrical shock.

### 2. General safety instructions and warranty

The EC type examination was carried out by the approved and notified office 0299.

This item was tested according to EN 420, EN 407 and EN 388 and achieved the following results: Protection class 2. Dexterity Class 3.

The measured classifications refer to the layered structure of the inside of the palms. An 'x' instead of a number means the glove was not tested for this risk. The classifications always refer to the entire item, including all layers. Contact heat refers to the insides of the palms, convective heat to the hands and cuffs. Contact heat provides protection up to a temperature of 100 °C.

There are currently no standardised test methods for UV permeability.

**Explanation of symbols:** CE = EC mark of conformity

We cannot be held liable for damage caused by the following:

- improper use
- unsuitable, improper or negligent treatment
- not observing this manual
- improper repairs
- installing replacement parts and accessories which do not correspond to the original version

The gloves may undergo a cleaning process. If this is done properly or professionally, the gloves can still be used but without any guarantee that the measured classifications remain valid or can still be achieved.

This item is covered by a 2-year guarantee.

This only covers damage that is caused by intentional or grossly negligent actions of the legal representative of our company. For questions or complaints, please contact the specialised dealer. Keep these instructions for future reference. The warranty period starts from the date on the receipt. Please keep your receipt in a safe place.

### 3. Service and Contact

For questions, suggestions or complaints our customer service centre is here for you Monday through Friday from 8 am to 6 pm.
